

ORIGO Stepping Stones

Comprehensive Mathematics for Grades K-6

ORIGO Stepping Stones is a K-6 program that makes teaching and learning mathematics meaningful, enjoyable, and accessible for all.

Stepping Stones promotes student growth by equipping students with the thinking and reasoning skills needed to become confident and successful in math.

Why Stepping Stones?

By utilizing the research-based **Spaced Learning Approach**, *Stepping Stones* offers a unique teaching and learning experience. Rather than cramming each topic into a concentrated period of time, which often results in forgetting the math, content is spread across the year. This gives students opportunities to engage with the content before a period of deliberate practice—developing mastery which is retained and reduces the need for continuous reteaching.

Scope & Sequence

Versus

Stepping Stones
Scope & Sequence

Research indicates that with a **Spaced Learning Approach**, students can achieve the equivalent of 1.5 years of learning within a single school year. This approach is especially effective in math education, as each new skill builds on the foundation of future mathematical learning.

Scavenger Hunt

- 1** Open the *Grade 1 Stepping Stones Teacher Edition* and turn to **Module 4, Lesson 4.3: Subtraction: Writing equations** Lesson focus.
- 2** Turn to the teacher notes on the **4.3 Lesson** page. How many steps are in this and every *Stepping Stones* lesson?
- 3** Turn to the **More Math** page for **Lesson 4.3**? How many investigation problems are on that page?
- 4** Turn to **Differentiation** for Lesson **4.3**. How many differentiation activities are provided?
- 5** Open the Grade 1 Big Book *Cupcake Capers*. These are used in every K-2 module to develop language in a fun and accessible way. In *Cupcake Capers*, turn to **page 13**. How many cupcakes did Little Fox grab?
- 6** Open *Student Journal A* and turn to Lesson 4.3. In **Step Up**, how many boxes do students fill for question 1?

With *ORIGO Stepping Stones*, it all adds up!

- Find the sum of your 5 answers above and then multiply the sum by 3.
- Email your Resource Advisor with your total and ORIGO Education will send you an ORIGO koala and pen!
