

ORIGO Stepping Stones

Comprehensive Mathematics for Grades K-6

ORIGO Stepping Stones is a K-6 program that makes teaching and learning mathematics meaningful, enjoyable, and accessible for all.

Stepping Stones promotes student growth by equipping students with the thinking and reasoning skills needed to become confident and successful in math.

Why Stepping Stones?

By utilizing the research-based **Spaced Learning Approach**, *Stepping Stones* offers a unique teaching and learning experience. Rather than cramming each topic into a concentrated period of time, which often results in forgetting the math, content is spread across the year. This gives students opportunities to engage with the content before a period of deliberate practice—developing mastery which is retained and reduces the need for continuous reteaching.

Scope & Sequence**

Versus

**Stepping Stones
Scope & Sequence**

Research indicates that with a **Spaced Learning Approach**, students can achieve the equivalent of 1.5 years of learning within a single school year. This approach is especially effective in math education, as each new skill builds on the foundation of future mathematical learning.

Scavenger Hunt

1 Open the *Grade 3 Stepping Stones Teacher Edition* and turn to **Module 1, Lesson 1.4: Writing four-digit numerals and number names** Lesson focus.

2 Turn to the teacher notes on the **1.4 Lesson** page. How many steps are in this and every *Stepping Stones* lesson?

3 Turn to **Differentiation** for Lesson 1.4. How many differentiation activities are provided.

4 Open *Student Journal A* and turn to Lesson 1.4. In **Step Up**, how many hundreds are in the response for question 1a?

5 Turn to Lesson 1.4 Maintaining concepts and skills in *Student Journal A*. In **Ongoing Practice**, how many boxes need to be completed for question 2?

With ORIGO Stepping Stones, it all adds up!

- Find the sum of your 4 answers above, subtract 12 and then multiply the difference by 3.
- Email your Resource Advisor with your total and ORIGO Education will send you an ORIGO koala and pen!
