

ORIGO Stepping Stones

Comprehensive Mathematics for Grades K-6

ORIGO Stepping Stones is a K-6 program that makes teaching and learning mathematics meaningful, enjoyable, and accessible for all.

Stepping Stones promotes student growth by equipping students with the thinking and reasoning skills needed to become confident and successful in math.

Why Stepping Stones?

By utilizing the research-based **Spaced Learning Approach**, *Stepping Stones* offers a unique teaching and learning experience. Rather than cramming each topic into a concentrated period of time, which often results in forgetting the math, content is spread across the year. This gives students opportunities to engage with the content before a period of deliberate practice—developing mastery which is retained and reduces the need for continuous reteaching.

Scope & Sequence**

Versus

**Stepping Stones
Scope & Sequence**

Research indicates that with a **Spaced Learning Approach**, students can achieve the equivalent of 1.5 years of learning within a single school year. This approach is especially effective in math education, as each new skill builds on the foundation of future mathematical learning.

Scavenger Hunt

1 Open the *Kindergarten Stepping Stones Teacher Edition* and turn to **Kindergarten Module 2, Lesson 2.5 : Number: Introducing the number track.**

2 Turn to teacher notes 2.5 **Whole group –Lesson** page. How many steps are in this and every lesson?

3 How many **small group activities** are included in every K lesson?

4 Open the Kindergarten Big Book *Hip Hop Hippos*. These are used in every K-2 module to develop language in a fun and accessible way. In *Hip Hop Hippos*, on what page number do the hippos share **loads of laughter**?

5 Open the Kindergarten student practice book to **Lesson 2.5**. How many jars are on the page?

6 Open the Kindergarten student journal to **Lesson 2.5**. How many numbers are missing on the number track for question 1a?

With ORIGO Stepping Stones, it all adds up!

- Find the sum of your 4 answers above, subtract 12 and then multiply the difference by 3.
- Email your Resource Advisor with your total and ORIGO Education will send you an ORIGO koala and pen!
